

# Phone Adapter with Router

## Quick Installation

**Package Contents**

- Phone Adapter with Router
- 5 V Power Adapter
- RJ-45 Ethernet Cable
- RJ-11 Phone Cable (not included with all models)
- Power Adapter
- Quick Installation

## Before You Begin

Make sure you have the following:

- An active Internet connection
- An active Internet phone service account and its settings
- A cable/DSL modem
- One computer for configuration of the Phone Adapter
- An analog telephone or fax machine with an RJ-11 phone cable

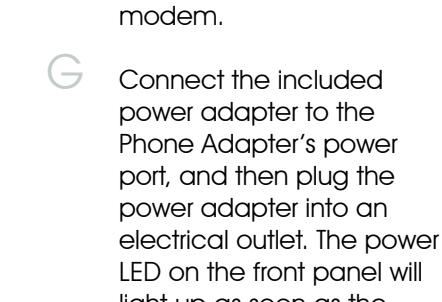

### 1 Connect the Phone Adapter

A Power off your network devices, including your modem and PC.

B Connect one end of an RJ-11 phone cable to the Phone Adapter's PHONE 1 port. Connect the other end to your analog telephone or fax machine.

**IMPORTANT:** Do not connect the PHONE port to a telephone wall jack. Make sure you only connect a telephone or fax machine to the PHONE port. Otherwise, the Phone Adapter or the telephone wiring in your home or office may be damaged.

C Repeat Step B with the PHONE 2 port if you have an additional telephone or fax machine to connect.

B

H Power on your PC.

D The Router - Status screen will appear. Click the WAN Setup tab.

E NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

D Connect one end of an Ethernet network cable (included) to the ETHERNET port of the Phone Adapter. Connect the other end to the Ethernet port of your PC.

E Connect one end of a different Ethernet network cable to the INTERNET port of the Phone Adapter. Connect the other end to your cable/DSL modem.

F Power on the cable/DSL modem. Proceed to step D.

G If your ITSP supplied a password, you will see a login screen. In the User Name field, enter user, the default user name for user access (this cannot be changed). Then enter the password supplied by your ITSP.

H The Router - Status screen will appear. Click the WAN Setup tab.

I NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A Launch the web browser on the PC.

B Enter <http://192.168.0.1/> advanced in the Address field (192.168.0.1 is the default local IP address of the Phone Adapter). Then press the Enter key.

D DHCP

1 Select DHCP for the Connection Type.

2 If you use a cable modem, you may need to configure the MAC Clone Settings. (Contact your ISP for more information.)

E Enable MAC Clone Service.

If your service uses a specific PC MAC address, then select yes from the Enable MAC Clone Service setting. Then enter the PC's MAC address in the Cloned MAC Address field.

3 Click Submit All Changes.

F Static IP

1 Select Static IP for the Connection Type.

2 In the Static IP Settings section, enter the IP address in the Static IP field, the subnet mask in the NetMask field, and the default gateway IP address in the Gateway field.

J Configure the Phone Adapter.

K Click Submit All Changes.

L The Router - Status screen will appear. Click the WAN Setup tab.

M NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

N Configure the Phone Adapter.

O Click Submit All Changes.

P The Router - Status screen will appear. Click the WAN Setup tab.

Q NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

R Configure the Phone Adapter.

S Click Submit All Changes.

T The Router - Status screen will appear. Click the WAN Setup tab.

U NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

V Configure the Phone Adapter.

W Click Submit All Changes.

X The Router - Status screen will appear. Click the WAN Setup tab.

Y NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

Z Configure the Phone Adapter.

A1 Click Submit All Changes.

A2 The Router - Status screen will appear. Click the WAN Setup tab.

A3 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A4 Configure the Phone Adapter.

A5 Click Submit All Changes.

A6 The Router - Status screen will appear. Click the WAN Setup tab.

A7 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A8 Configure the Phone Adapter.

A9 Click Submit All Changes.

A10 The Router - Status screen will appear. Click the WAN Setup tab.

A11 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A12 Configure the Phone Adapter.

A13 Click Submit All Changes.

A14 The Router - Status screen will appear. Click the WAN Setup tab.

A15 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A16 Configure the Phone Adapter.

A17 Click Submit All Changes.

A18 The Router - Status screen will appear. Click the WAN Setup tab.

A19 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A20 Configure the Phone Adapter.

A21 Click Submit All Changes.

A22 The Router - Status screen will appear. Click the WAN Setup tab.

A23 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A24 Configure the Phone Adapter.

A25 Click Submit All Changes.

A26 The Router - Status screen will appear. Click the WAN Setup tab.

A27 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A28 Configure the Phone Adapter.

A29 Click Submit All Changes.

A30 The Router - Status screen will appear. Click the WAN Setup tab.

A31 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A32 Configure the Phone Adapter.

A33 Click Submit All Changes.

A34 The Router - Status screen will appear. Click the WAN Setup tab.

A35 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A36 Configure the Phone Adapter.

A37 Click Submit All Changes.

A38 The Router - Status screen will appear. Click the WAN Setup tab.

A39 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A40 Configure the Phone Adapter.

A41 Click Submit All Changes.

A42 The Router - Status screen will appear. Click the WAN Setup tab.

A43 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A44 Configure the Phone Adapter.

A45 Click Submit All Changes.

A46 The Router - Status screen will appear. Click the WAN Setup tab.

A47 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A48 Configure the Phone Adapter.

A49 Click Submit All Changes.

A50 The Router - Status screen will appear. Click the WAN Setup tab.

A51 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A52 Configure the Phone Adapter.

A53 Click Submit All Changes.

A54 The Router - Status screen will appear. Click the WAN Setup tab.

A55 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A56 Configure the Phone Adapter.

A57 Click Submit All Changes.

A58 The Router - Status screen will appear. Click the WAN Setup tab.

A59 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A60 Configure the Phone Adapter.

A61 Click Submit All Changes.

A62 The Router - Status screen will appear. Click the WAN Setup tab.

A63 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A64 Configure the Phone Adapter.

A65 Click Submit All Changes.

A66 The Router - Status screen will appear. Click the WAN Setup tab.

A67 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A68 Configure the Phone Adapter.

A69 Click Submit All Changes.

A70 The Router - Status screen will appear. Click the WAN Setup tab.

A71 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A72 Configure the Phone Adapter.

A73 Click Submit All Changes.

A74 The Router - Status screen will appear. Click the WAN Setup tab.

A75 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A76 Configure the Phone Adapter.

A77 Click Submit All Changes.

A78 The Router - Status screen will appear. Click the WAN Setup tab.

A79 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A80 Configure the Phone Adapter.

A81 Click Submit All Changes.

A82 The Router - Status screen will appear. Click the WAN Setup tab.

A83 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A84 Configure the Phone Adapter.

A85 Click Submit All Changes.

A86 The Router - Status screen will appear. Click the WAN Setup tab.

A87 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A88 Configure the Phone Adapter.

A89 Click Submit All Changes.

A90 The Router - Status screen will appear. Click the WAN Setup tab.

A91 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A92 Configure the Phone Adapter.

A93 Click Submit All Changes.

A94 The Router - Status screen will appear. Click the WAN Setup tab.

A96 Configure the Phone Adapter.

A97 Click Submit All Changes.

A98 The Router - Status screen will appear. Click the WAN Setup tab.

A99 NOTE: Make sure your PC's Ethernet adapter is set to obtain an IP address automatically. For more information, refer to Windows Help.

A100 Configure the Phone Adapter.

A101 Click Submit All Changes.

# Using the Interactive Voice Response Menu

3 In the Optional Settings section, enter the DNS server address(es) in the Primary DNS and optional Secondary DNS fields.

4 Click **Submit All Changes**.

**PPPoE** (most DSL users)

1 Select PPPoE for the Connection Type.

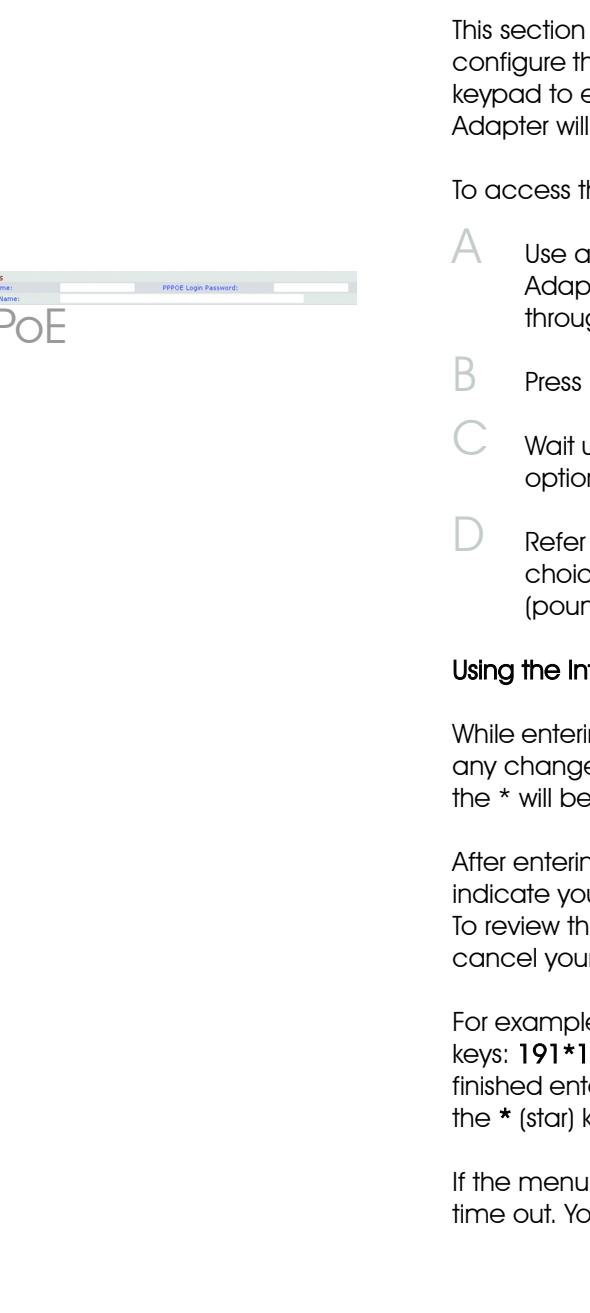

2 Enter the user name in the *PPPoE Login Name* field, and enter the password in the *PPPoE Login Password* field.

3 Click **Submit All Changes**.

If the Phone Adapter is pre-configured by your ISP, then you do not need to change any of the default voice settings. Refer to the documentation supplied by your service provider for more information.

If you want to change the settings for your Internet phone service, refer to the User Guide, which is available on the Linksys website at [www.linksys.com](http://www.linksys.com).

If you want to configure network settings using the Interactive Voice Response Menu, refer to the next section.

This section explains how to use the Interactive Voice Response Menu to configure the Phone Adapter's network settings. You will use the telephone's keypad to enter your commands and select choices, and the Phone Adapter will use voice responses.

To access the Interactive Voice Response Menu:

- A Use a telephone connected to the PHONE port of the Phone Adapter. (You can only access the Interactive Voice Response Menu through an analog telephone, not any of the Internet phones.)
- B Press **\*\*\*\*** (in other words, press the star key four times).
- C Wait until you hear the "Linksys configuration menu—please enter the option followed by the # (pound) key or hang up to exit" response.
- D Refer to the following table that lists actions, commands, menu choices, and descriptions. After you select an option, press the # (pound) key. To exit the menu, hang up the telephone.

## Using the Interactive Voice Response Menu

While entering a value, such as an IP address, you may exit without entering any changes. Press the \* (star) key twice within half a second. Otherwise, the \* will be treated as a decimal point or dot.

After entering a value, such as an IP address, press the # (pound) key to indicate you have finished your selection. To save the new setting, press 1. To review the new setting, press 2. To re-enter the new setting, press 3. To cancel your entry and return to the main menu, press \* (star).

For example, to enter the IP address 191.168.1.105 by keypad, press these keys: 191\*168\*1\*105. Press the # (pound) key to indicate that you have finished entering the IP address. Then press 1 to save the IP address or press the \* (star) key to cancel your entry and return to the main menu.

If the menu is inactive for more than one minute, the Phone Adapter will time out. You will need to re-enter the menu by pressing **\*\*\*\***.

The settings you have saved will take effect after you hang up the telephone. The Phone Adapter may reboot at this time.

## Interactive Voice Response Menu

Action	Command	Choices	Description
Set Static IP Address	<b>111</b>		First, set the Internet Connection Type to static IP address; otherwise, you will hear, "Invalid Option," if you try to set the static IP address. Use the * (star) key when entering a decimal point.
Enter Interactive Voice Response Menu	<b>****</b>		Use this command to enter the Interactive Voice Response Menu. Do not press any other keys until you hear, "Linksys configuration menu. Please enter the option followed by the # (pound) key or hang up to exit."
Set Network (or Subnet) Mask	<b>121</b>		First, set the Internet Connection Type to static IP address; otherwise, you will hear, "Invalid Option," if you try to set the network or subnet mask. Use the * (star) key when entering a decimal point.
Check Internet Connection Type	<b>100</b>		Hear the Internet connection type of the Phone Adapter.
Check Internet IP Address	<b>110</b>		Hear the IP address assigned to the Phone Adapter's Internet (external) interface.
Check Network Mask (or Subnet Mask)	<b>120</b>		Hear the network or subnet mask assigned to the Phone Adapter.
Check Gateway IP Address	<b>130</b>		Hear the IP address of the Phone Adapter (usually the network router).
Check MAC Address	<b>140</b>		Hear the MAC address of the Phone Adapter in hexadecimal string format.
Check Firmware Version	<b>150</b>		Hear the version number of the firmware running on the Phone Adapter.
Check Primary DNS Server IP Address	<b>160</b>		Hear the IP address of the primary DNS (Domain Name Service) server. Use the * (star) key when entering a decimal point.
Check Internet Web Server Port	<b>170</b>		Hear the port number of the Internet Web server used for the Web-based Utility.
Check Local IP Address	<b>210</b>		Hear the local IP address of the Phone Adapter.
Set Internet Connection Type	<b>101</b>	DHCP - Press 0. Static IP - Press 1. PPPoE - Press 2.	Select the type of Internet connection you are using. Refer to the documentation supplied by your Internet Service Provider (ISP).
Manual Reboot	<b>732668</b>		After you hear, "Option successful," hang up the phone. The Phone Adapter will automatically reboot.

## Interactive Voice Response Menu

Action	Command	Choices	Description
Factory Reset	<b>73738</b>	Confirm - Press 1. Cancel - Press * (star).	This feature may be protected by a password available only from your ISP. If necessary, enter the password*. The Phone Adapter will request confirmation; enter 1 to confirm. You will hear, "Option successful." Hang up the phone. The Phone Adapter will reboot, and all settings will be reset to their defaults.
User Factory Reset	<b>877778</b>	Confirm - Press 1. Cancel - Press * (star).	The Phone Adapter will request confirmation; enter 1 to confirm. You will hear, "Option successful." Hang up the phone. The Phone Adapter will reboot and all user-configurable settings will be reset to their factory default settings.

\* Follow these instructions to enter the password.

- A, B, C, a, b, or c — press 2.
- D, E, F, d, e, or f — press 3.
- G, H, I, g, h, or i — press 4.
- J, K, L, j, k, or l — press 5.
- M, N, O, m, n, or o — press 6.
- P, Q, R, S, o, q, r, or s — press 7.
- T, U, V, t, u, or v — press 8.
- W, X, Y, Z, w, x, y, or z — press 9.
- All Other Characters — press 0.

For example, to enter the password *phone@321* by keypad, press these keys: **746630321**. Then press the # (pound) key to indicate that you have finished entering the password. To cancel your entry and return to the main menu, press \* (star).
